

The seventh IEEE eCrime Researchers Summit 2012 once again will be held in conjunction with the 2012 APWG General Meeting between October 22-25, 2012 in Las Croabas, Puerto Rico. eCRS 2012 consist of two full days which bring together academic researchers, security practitioners, and law enforcement to discuss all aspects of electronic crime and ways to combat it. Topics of interests include:

- **Case studies of current attack methods, including phishing, malware, rogue antivirus, pharming, crimeware, botnets, and emerging techniques**
- **Case studies of online advertising fraud, including click fraud, malvertising, cookie stuffing, and affiliate fraud**
- **Case studies of large-scale take-downs, such as coordinated botnet disruption**
- **Technical, legal, political, social and psychological aspects of fraud and fraud prevention**
- **Economics of online crime, including measurement studies of underground economies and models of e-crime**
- **Uncovering and disrupting online criminal collaboration and gangs**
- **Financial infrastructure of e-crime, including payment processing and money laundering**
- **Techniques to assess the risks and yields of attacks and the effectiveness of countermeasures**
- **Delivery techniques, including spam, voice mail, social network and web search manipulation; and countermeasures**
- **Techniques to avoid detection, tracking and take-down; and ways to block such techniques**
- **Best practices for detecting and avoiding damages to critical internet infrastructure, such as DNS and SCADA, from electronic crime activities**

Accepted papers will be published in proceedings. In addition, cash awards will be given for the best paper overall and the best student co-authored paper. A limited number of cash travel awards will also be made to student authors of papers and posters.

Full and RIP paper submissions due: August 3, 2012

Paper notification: September 3, 2012

Conference: October 22-24, 2012

Camera ready due: November 2, 2012

Organizing Committee

General Chair: Randy Vaughn, Baylor University

Program Co-Chairs:

Saeed Abu-Nimeh, PayPal

Tyler Moore, SMU

Steering Committee: Don M. Blumenthal, Global Cyber Risk LLC

Jay Brennan, Mitre

Markus Jakobsson, Palo Alto Research Center

Oliver Friedrichs, Immundet

Susanne Wetzels, Stevens Institute of Technology

Technical Program Committee

Manos Antonakakis, Damballa

Jean Camp, Indiana University

Tom Chen, Swansea University

Richard Clayton, University of Cambridge

Nicolas Christin, Carnegie Mellon University

Michael Collins, RedJack

Eric Davis, Google

Benjamin Edelman, Harvard Business School

Jens Grossklags, The Pennsylvania State University

Thorsten Holz, Ruhr-University Bochum

Markus Jakobsson, PayPal

Susanne Wetzels, Stevens Institute of Technology

Gráinne Kirwan, IADT

Christian Kreibich, International Computer Science Institute

Corrado Leita, Symantec Research Labs

Kirill Levchenko, University of California San Diego

Thomas Morris, Mississippi State University

Jose Nazario, Arbor Networks

Roberto Perdisci, University of Georgia

Sid Stamm, Mozilla

Brad Wardman, PayPal

Gary Warner, The University of Alabama at Birmingham

Maxim Weinstein, StopBadware
